

# Hydraulic Lifts for Tramways and Streetcars - worldwide!

For more than 80 year our family owned company has been working in the area of lifting technology. Over the decades we have strengthened and developed our expertise. Today we develop and manufacture lifting equipment distinguished by a high level of reliability and easy maintenance. Quality and innovations are driving our company philosophy.

Our product line for tramway and streetcar lifts includes also:

- Repair and maintenance
- Bogie changeover
- Wash bays
- Paint booth (with explosion-proof!)

We challenge any lifting requirement!

- Recessed track segments with floor levelers
- Lifting of bogies and railcar body - as well as combination of both
- Working lifts for bogie assembly, repair and service
- Working pits with moveable side pit lifting equipment
- ....

JAB-Lifting technology is also available in a telescopic version with a reduced installation depth.

## JAB-Characteristics:

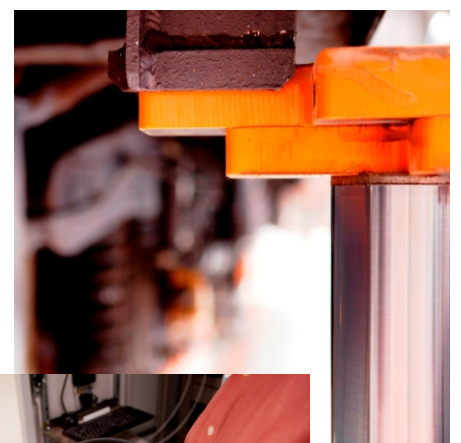

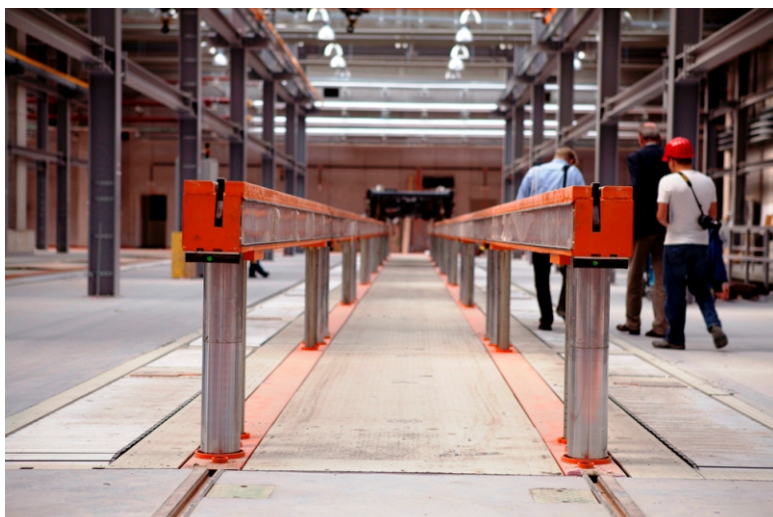

- fully hydraulic drive
- low motor capacity required
- lowest maintenance level
- electronic synchronisation
- mechanical safety bars or hydraulic acc. EN 1493
