- Annual turnover compressors 40 %
- Export share approx. 65 %

## JAB oldest, still existing lift manufacturer in Europe

- The company J.A. Becker & Söhne has been founded in **1897** by Jacob August Becker in Neckarsulm. Initially locksmithers works have been offered for local industry.
- Beginning with the past century, serial production of spindles for woodmachining has been started.
- In the 1920s, the first own product has been designed and manufactured: fruit- and grape presses.

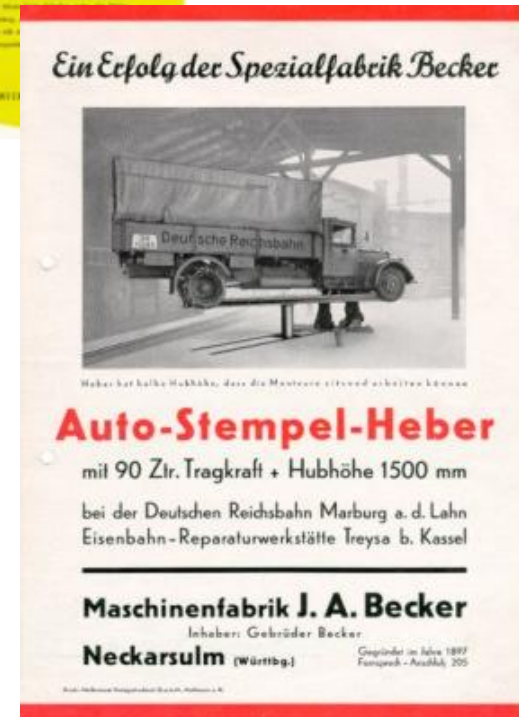

# Company Presentation

- In **1925** the hydraulic was used a enhancement of the mechanical spindle. Nearby the power of the hydraulic was longer used for pressing only but also for lifting.
- **1929** the manufacturing of the now type JAB-products started: Hydraulic vehicles lifts .
- Since that time, the development and engineering of vehicle lifts keep space with changing trends and developments in automobile industry.

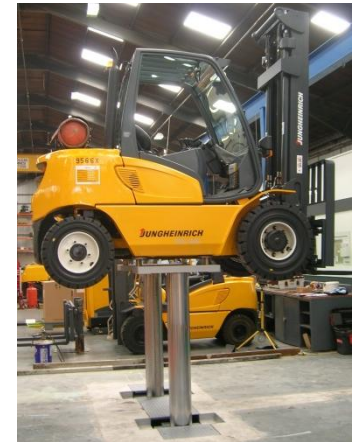

# Company Presentation

*Today the JAB product program contains:  
Hydraulic Inground-Lifts for passenger cars,  
trucks, buses, rail- and special vehicles.  
But also hydraulic special solutions for  
industry and automobile production.*

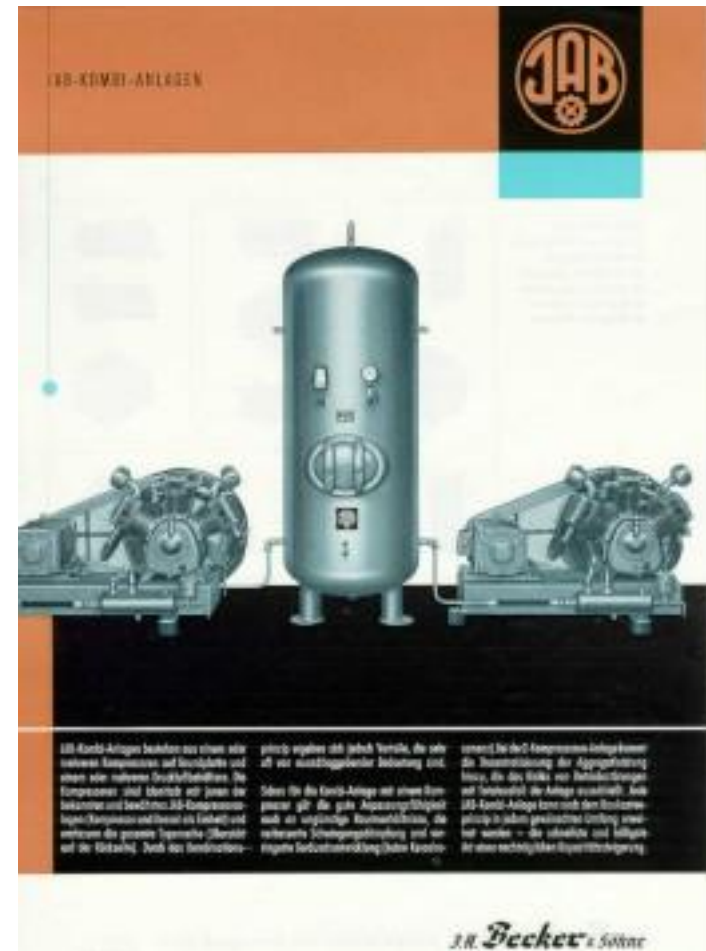

# Company Presentation

- Parallel to the development of the lifts, the construction and manufacturing of the compressors took place.
